Product Design Leader with nearly two decades of experience architecting scalable, tokenized design systems and AI-integrated product interfaces. Proven track record of building and scaling high-performing design teams to deliver seamless, sustainable user experiences. A strategic, product-oriented problem solver who leverages modern AI methodologies and research-backed insights to drive workflow efficiency, cross-functional collaboration, and measurable business impact.

05 Experience

Feb 2023 - Present

Founder
MONOONO

Founded and scaled a premier product consultancy agency to address high-level enterprise demand for specialized UX/UI and product strategy services.

Delivered strategic design consulting and execution across diverse global sectors, including FinTech, HealthTech, AI-enabled hardware, logistics, and major European/Asian automotive groups, consistently driving product innovation and market growth.

Jan 2024 - Dec 2025

Design System Manager
Banca Transilvania

Directed the corporate Design System and led UX for the flagship business banking app, establishing a unified visual language across all enterprise digital products.

Architected scalable operating models and streamlined designer-to-developer handoff procedures. Cultivated a high-performance design culture by initiating strategic design sprints, structured critique sessions, and advanced design tokenization workshops.

Jan 2016 - Jul 2024

CoFounder
Appselent

Co-founded a highly successful app development agency, partnering with elite iOS engineering talent to deliver premium mobile experiences.

Led end-to-end product design and launch strategies for numerous client and proprietary applications. Designed a flagship app that has maintained its #1 category ranking for nearly a decade, establishing an enduring industry benchmark.

Feb 2016 - Jul 2017

Design Manager
Halcyon

Restructured and optimized the UI/UX departments, defining rigorous new quality guidelines and agile workflows to accelerate product delivery.

Engineered a seamless operational pipeline from initial client briefing through to final development handoff. Mentored design teams, spearheaded iterative design sprints, and fostered a collaborative environment driven by structured peer reviews.

Mar 2014 - Dec 2015

Senior Product Designer
Rivo

Led comprehensive, data-driven UX research initiatives to identify and resolve critical friction points within the existing enterprise client base. Redesigned core product workflows and UI architectures to vastly improve user retention.

Elevated the corporate brand identity through a strategic visual refresh and the creation of a definitive brand system, resulting in a cohesive, premium product experience.

Dec 2013 - Mar 2014

Product Designer
Freelance

Consulted as a lead product designer for prominent Silicon Valley startups and established global brands. Delivered end-to-end services including Customer Experience strategy, rigorous UX research, comprehensive branding, and high-fidelity UI design.

Executed cross-platform design solutions (iOS, Android, Web) across highly technical sectors including enterprise SaaS, eCommerce, EdTech, MedTech, and IoT ecosystems.

Jan 2011 - Nov 2013

Product Designer
Arobs

Pioneered UX research and interface design across a massive portfolio of digital products. Adapted rapidly to emerging technologies, designing for early smartphones, feature phones, and initial IoT ecosystems.

Delivered versatile, user-centric interfaces across iOS, Android, and Web platforms for a wide spectrum of industries, establishing foundational expertise in cross-platform product architecture.

Feb 2008 - Mar 2010

UI Designer
Emotion Studios

I branded startups. Defined brand guidelines. Designed software services, websites and social platforms. Created prints and visuals along with marketing media for promotional purposes. Crafted visuals for an election campaign.

Sep 2006 - Mar 2007

Graphic & Web Designer
Unicdesign

I created designs and original artworks for every kind of tradition and digital advertising medium. Worked on numerous branding, identity, print, publishing, signage, and web design. Conceptualized advertising campaigns.

06 Highlights

Analog Devices

HARDWARE & APP

Spearheaded the end-to-end UX/UI design of a comprehensive hardware-software learning platform, empowering emerging electrical engineers with an intuitive desktop ecosystem.

BMW Group

CONFIGURATOR

Directed a scalable, multi-brand design system architecture leveraging advanced design tokens. Streamlined designer-to-developer handoff by bridging design variables directly into CI/CD pipelines, significantly reducing time-to-market.

Geely Group

CONFIGURATOR

Led the product design and deployment of an exclusive mobile showroom app, equipping global sales representatives with a high-performance, immersive digital sales tool for international auto shows.

Nokia

OS INTERFACE

Commissioned by Nokia to conceptualize and design a minimalist, vector-based mobile operating system. This foundational UX/UI work ultimately shaped the visual language of the Windows Phone OS.

RedBull

MOBILE GAME

Drove end-to-end art direction, UX/UI, and animation for the flagship RedBull skydiving mobile game, delivering a highly engaging, physics-based user experience across Android and Windows Phone.

Brookfield Properties

PROPERTY APP

Engineered a robust commercial property management application, seamlessly integrating complex IoT and smart-building interactions into a clean, unified dashboard for enterprise facility managers.

Allianz

BANKING APP

Architected a secure, omni-channel mobile banking experience across tablet and mobile. Prioritized frictionless transaction flows, intuitive account management, and rigorous financial security standards within a unified design language.

Garanti

MOBILE APP

Streamlined complex consumer loan applications by designing a dedicated, conversion-optimized mobile app. Transformed tedious financial forms into an elegant, step-by-step mobile experience that dramatically reduced user drop-off.

Banca Transilvania

SYSTEMS

Directed the corporate Design System and led UX for the flagship business banking app. Standardized components across the enterprise, ensuring consistency and accelerating development velocity for all digital products.

Hotelzone

BOOKING PORTAL

Overhauled a legacy global B2B booking portal, orchestrating a strategic, data-driven UX redesign. Executed a progressive 6-month feature rollout to maximize user adoption and minimize operational friction.

DOF Slider

IOS APP

Conceptualized, designed, and launched a precision depth-of-field calculator app. Solved critical usability challenges for professional photographers by delivering instant, mathematically accurate focus data in a sleek iOS interface.

AI Camera

HARDWARE

Prototyped and 3D-modeled the hardware and physical UX for an industrial-grade AI camera system powering warehouse robotics. Delivered production-ready schematics under strict NDA, bridging physical and digital product design.

07 Products

aegenti.com

AI & AGENTIC

Pioneered an AI-native product development ecosystem. Engineered sophisticated software agents, bespoke autonomous workflows, and intuitive conversational interfaces to automate complex enterprise tasks.

pomodoron.com

PRODUCTIVITY

Designed and shipped a premium productivity application combining cognitive science with a highly refined, minimalist UI. Engineered a custom celestial timeline visualization to seamlessly protect user focus and prevent burnout.

wotisy.com

TIME CONVERTER

Architected a global timezone convergence tool to solve remote team coordination challenges. Developed an elegant visual overlapping algorithm that instantly harmonizes cross-continental schedules without cognitive friction.

wohoca.com

CALENDAR

Built and scaled a comprehensive global holiday calendar platform supporting 48 countries and 10 languages. Engineered a robust data pipeline to ensure absolute accuracy for international compliance and remote planning.

camculator.com

PHOTOGRAPHY

Developed a highly technical, precision calculator for professional astrophotographers. Engineered complex mathematical models to instantly compute hyperfocal distances, diffraction limits, and optimal timelapse parameters within a clean UI.

salariul.com

FINANCE

Engineered a robust financial utility for Romanian wage calculations. Designed a highly intuitive interface capable of instantly processing complex, sector-specific tax algorithms and copyright contracts with 100% accuracy.
